

Medicines, delivered. *Same day.*

1mg, PharmEasy, and Apollo Pharmacy deliver prescription and over-the-counter medicines to your home. Often cheaper than the local shop.

WHAT'S INSIDE

- ✓ Find a medicine app
- ✓ Upload your prescription
- ✓ Get medicines delivered

— WHY THIS MATTERS

Don't run to the chemist. Send medicine to yourself.

Online pharmacies in India work the same as the chemist down the road. Type the medicine name, upload your doctor's prescription if needed, and the medicine arrives in hours.

Often 15-20% cheaper than the chemist. And you don't leave home — especially helpful when you're not feeling well.

WHAT YOU'LL LEARN

- Pick a trusted pharmacy app
- Search for your medicine
- Upload prescription if needed
- Track and receive delivery

🕒 *Takes about 6 minutes to read*

1

STEP 1 OF 6

Choose a trusted app

Use only WELL-KNOWN pharmacy apps:

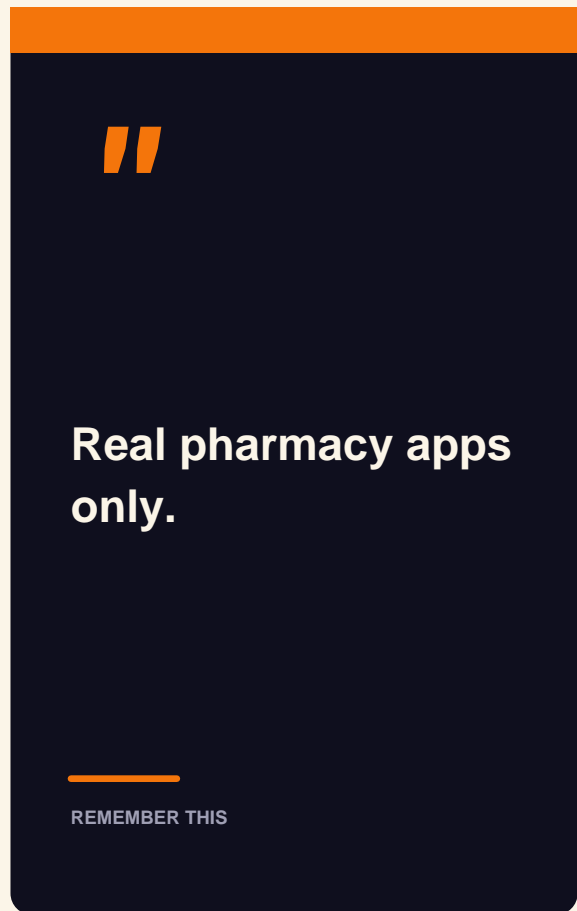

- 1mg (Tata 1mg)
- PharmEasy
- Apollo Pharmacy
- Netmeds

These are licensed by the government. Don't trust unknown apps for medicines.

WARNING

Never buy medicines from random websites or links sent on WhatsApp. Fake medicines can be dangerous. Only use the apps listed above.

2

STEP 2 OF 6

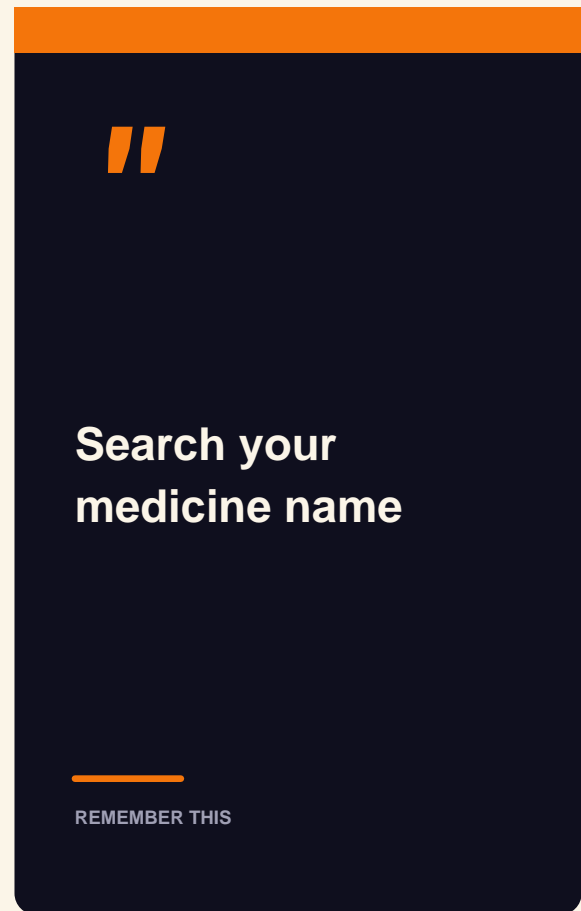

Search your medicine name

Tap the search bar. Type the EXACT name written on your medicine box.

If you can't read it well, ask a family member to type it. Wrong name = wrong medicine.

TIP

Take a photo of your prescription before searching. You can match the name letter-by-letter from the photo.

3

STEP 3 OF 6

Add to cart

Once you find your medicine, check:

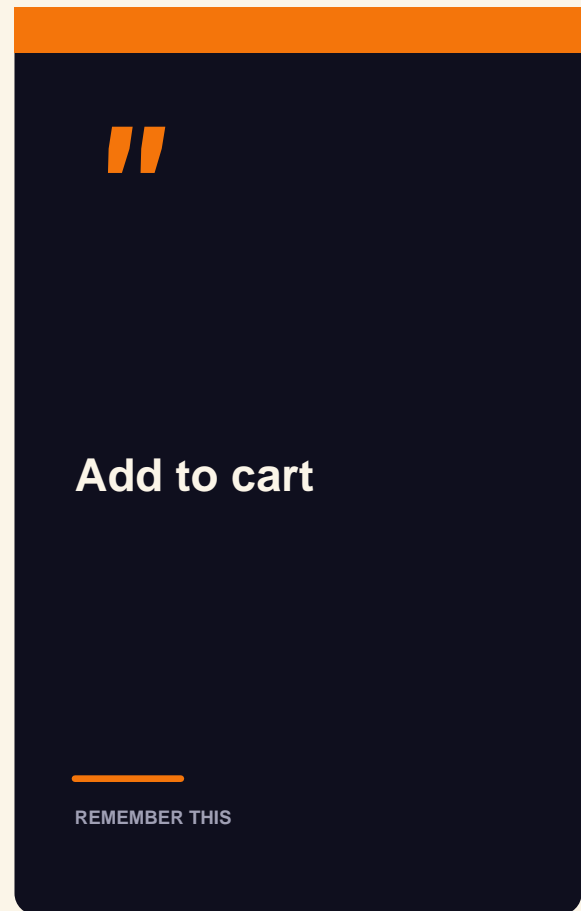

- Strength (e.g. 500 mg vs 250 mg)
- Quantity (10 tablets, 30 tablets, etc.)

Match exactly with what your doctor prescribed.
Tap '+' to add. The price shows next to the medicine.

WARNING

Strength matters. 500 mg is twice as strong as 250 mg of the same medicine. Always match the prescription exactly.

4

STEP 4 OF 6

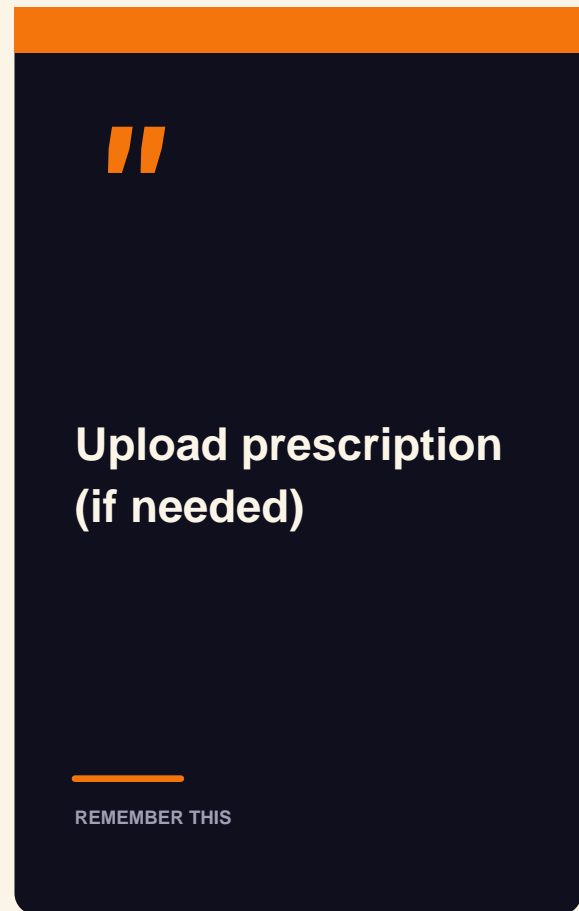

Upload prescription (if needed)

Many medicines need a doctor's prescription. The app asks you to upload it.

Tap 'Upload Prescription'. The app opens your camera. Take a clear photo of your doctor's prescription paper. Make sure all text is readable. Tap 'Done'.

TIP

Hold the prescription flat on a table. Good light. Photo must be clear and complete — including doctor's name and date.

5

STEP 5 OF 6

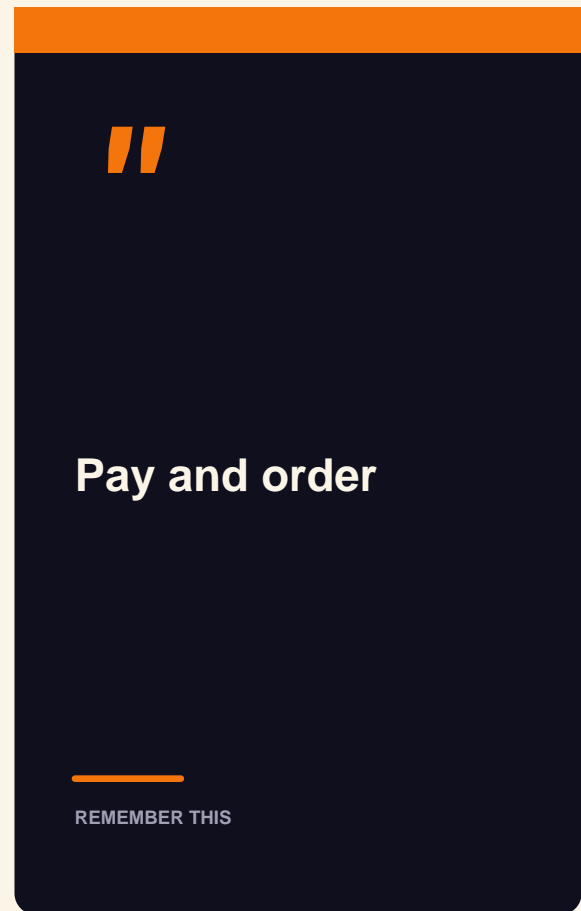

Pay and order

Choose payment — UPI, card, or cash on delivery.

Tap 'Place Order'. You'll see an estimated delivery time. The app reviews your prescription (usually 30-60 minutes) and then delivers.

TIP

First-time orders are often cheaper — apps offer 20-30% off coupons. Look for them on the home screen.

6

STEP 6 OF 6

Receive and verify

When delivered, BEFORE giving cash:

1. Check the medicine name on the box matches your prescription
2. Check the strength (mg)
3. Check the quantity
4. Check the expiry date — must be at least 6 months from now

WARNING

If anything doesn't match — DON'T accept. Refuse delivery. The app will refund you. Better safe than sorry with medicines.

”

**Wrong name, wrong strength, expired?
Refuse it.**

REMEMBER THIS

— QUICK RECAP

Medicines safely.

1

Trusted apps only

1mg, PharmEasy, Apollo, Netmeds. Never order medicines from random links or unknown apps.

2

Match the exact name

Type the medicine name letter-by-letter from your box or prescription. Wrong name = wrong medicine.

3

Strength is critical

500mg and 250mg are completely different doses. Always match what the doctor wrote.

4

Photo must be clear

When uploading prescription, take a clear, flat, well-lit photo. Doctor name and date must be visible.

5

Verify before paying

Check name, strength, quantity, expiry — all four — before accepting delivery.

School of *Elderly*

You did it.

We're proud of you.

Learning new things at any age takes courage. Tell your family what you learned today — they'll be proud too.
